There are different views as to whether or not it is useful for public, media and policy debates to discuss ethnic minorities as a whole, as well as more specific minority groups. Which comes closest to your view?

It is still useful to have an overall term of this kind, because there are enough similar experiences across different minority groups in Britain compared to the majority	40	40	39	39	43	38	41	38	34	45	35	41	39	36	42	38	33	10	43	41
It is outdated to have an overall term of this kind, because the different experiences of different minority groups in Britain are now more significant than the similarities	36	35	36	34	38	37	34	35	33	37	34	34	39	39	30	40	29	74	35	37

When policy-makers are planning an agenda for equal opportunities in Britain, they may have to consider how far it is possible to bring together approaches to different factors, including social class, geography, ethnicity, faith, gender, disability, sexuality and so on, that might affect fair chances in society.

Which of these approaches comes closest to your own view

Policy-makers should seek to link-up a fairness agenda that covers all of these factors, including class and race, because in practice advances in several of them can fit together and reinforce each other	56	57	55	51	61	56	60	50	54	59	54	53	61	58	55	61	41	81	61	57
Policy-makers should choose a fairness agenda that focuses on specific factors, such as class or race, because in practice it will prove too difficult to significantly advance across several of them at once	22	22	23	21	23	25	20	23	21	23	22	25	21	21	20	20	23	19	22	23

Different people may make different personal choices. We are interested in your view as to whether the government, schools, the media or others should try to encourage or discourage any particular way of thinking about our identities. Some people use hyphenated identities to describe themselves, for example Black-British, British-Asian, Irish-American and so on. Which of the following comes closest to your view?

I feel hyphenated identities, overall, can help to make national identity feel more inclusive of people from different backgrounds	54	55	52	58	64	51	51	48	39	57	50	55	52	53	55	59	39	51	55	56
I feel hyphenated identities, overall, risk fragmenting a sense of common identity among people of different backgrounds	23	23	23	16	18	29	23	24	28	24	22	21	27	20	23	29	22	34	25	22
